ABOUT THE COURSE

The purpose of this course is to teach the procedures and investigative techniques that are necessary for conducting a thorough investigation into an officer involved shooting. This includes the criminal aspect of the investigation conducted by investigators, as well as the administrative investigation conducted by Internal Affairs investigators. These are two separate, but necessary investigations and each has its unique characteristics, requirements, and limitations. This course will provide instruction on how to begin an officer involved shooting call out by gathering information, making assignments, and notifications. It will provide instruction on how to conduct on-scene responsibilities and how to effectively cooperate with all investigative agencies, such as the District Attorney, Police Integrity Division and the Medical Examiner's Office. The course is designed to provide an understanding of both the criminal and internal aspects of an officer involved shooting.
