ABOUT THE COURSE

This is a 40-hour basic course of instruction in Bloodstain Pattern Analysis. The course is designed for investigators, crime scene technicians, forensic scientists, and others involved in criminal, medical, or legal investigations involving blood shedding events. This course takes a hands-on approach to understanding bloodstain patterns. Approximately 50% of the course consists of experiments and practical exercises. It provides basic knowledge of bloodstain pattern analysis and the fundamentals of bloodstain pattern interpretation, documentation and reporting.

This program has been evaluated by the International Association of Bloodstain Pattern Analysts (IABPA) and is designed to meet the minimum standards recommended by the IABPA and the International Association for Identification for a Bloodstain Pattern Analysis Basic Course.

PREREQUISITES: None.

YOU WILL LEARN

- To recognize and identify bloodstain pattern evidence at the scene.
- To properly document, preserve and submitted suspected blood samples to a qualified crime laboratory for testing and analysis.
- To document their observations and actions in written reports.
- To properly identify mechanisms by which specific stains may have been created.
- Equipment selection and use for investigating crimes scenes with bloodstain evidence.
- To Recognize biohazards and personnel safety procedures.

ABOUT THE INSTRUCTORS

Rudy Flores started his career in 1982, serving as a deputy sheriff, and municipal police officer before joining the Texas Department of Public Safety, where he served as a Trooper, Sergeant and Texas Ranger.
